RE: Permit Modification (Railcar Cleaning)

Dear Mr. Zawodni:

After review of the permit application submitted to East Chicago Sanitary District (ECSD) and review of compliance data submitted from the pilot program, ECSD has modified Permit No. 901 to include the railcar cleaning process. Safety-Kleen will clean empty used oil railcars that carried the same petroleum based used oil that it already processed onsite. This wastewater will be pretreated before being discharged to ECSD. Page 4 of 9 of your current permit has been updated to reflect this additional wastestream. This page has also been updated to reflect the removal of the MPProx process wastestream. Spent caustic was previously processed through the MPProx process and then sent the treatment plant. This wastestream is now sent offsite. The attached page is an amendment that replaces the current page 4 in your permit. If you have any questions please feel free to contact me at (219) 391-8466 or ngeros@eastchicago.com

Sincerely,

Nickie Geros
Pretreatment Coordinator

cc: Gregory D. Crowley, P.E., Utilities Director, ECSD
Anthony DeBonis, Jr., Legal Counsel, ECSD

EAST CHICAGO SANITARY DISTRICT
EAST CHICAGO, INDIANA
DRAFT INDUSTRIAL WASTEWATER DISCHARGE PERMIT
NO. 901

Issued to

SAFETY-KLEEN SYSTEMS, INC

In compliance with Article 13.13.5.01 of the East Chicago Wastewater Ordinance No. 0-06-0007 (hereinafter "Ordinance"), the East Chicago Sanitary District (hereinafter "District"), by the issuance of this permit, authorizes:

Safety-Kleen Systems, Inc.
601 Riley Road
East Chicago, IN 46312

(hereinafter "Permittee") to discharge from the above-identified facility the following, and only the following, specific wastewater streams:

- 
- i) Sanitary wastewater
 - ii) Process water from refinery, emulsion breaking, and dehydration processes.
 - iii) Wash waters from interior cleaning of railroad cars used to bring used oil processed on site
 - iv) Non-contact cooling water from process operations
 - v) Precipitation collection in process areas and tank farm
 - vi) Process water from polychlorinated biphenyl (PCB) contaminated waste from the PCB Destruction Facility (only when necessary with proper approval from the District)

This permit sets forth the standards required of the Permittee by the District to ensure compliance with the limitations and conditions of the Ordinance and, where applicable, standards established by the State or Federal authorities.

In compliance with Article 13.13.5.02.4(b) of the Ordinance, the District designates both this permit and the Permittee's discharge and sampling location by the **identification number 901.**

The monitoring facility is located at the effluent of the treatment works on the north end of the property, by the flow meter.

By the issuance of this permit, the District acknowledges that the Permittee has complied with the application requirements set forth in Article 13.13.5.02.2 of the Ordinance.

By the issuance of this permit, the District acknowledges that the Permittee has paid the assessed permit application fee as provided in Article 13.13.4.03 of the Ordinance.

Unless otherwise specified, these requirements shall take effect upon issuance of this permit and shall remain in effect until the expiration date of this permit or until the permit is modified in accordance with Article 13.13.5.02.3 of the Ordinance. In accordance with Article 13.13.5.02.5 of the Ordinance, both this permit and the authorization to discharge will expire five (5) years from the date of issuance.
